

Maxence Poutord

Senior Software Engineer

Paris, France

maxence.poutord@gmail.com | +33767786250

maxpou.fr | github.com/maxpou | linkedin.com/in/maxpou

Senior Software Engineer with 15 years of experience, specializing in React, Vue, and TypeScript. I own technical decisions for a six-developer team and deliver features across frontend, Node.js backends, and Azure infrastructure. My work includes full application migrations and a search rebuild that reduced average backend response time from ~30 seconds to ~250 ms.

Experience

Senior Software Engineer

Orderfox | Remote (Paris and Berlin)

May 2021 - Present

- Owned architecture and infrastructure decisions for a six-developer team building a CNC industry application
- Led the migration from an in-house JavaScript framework to React, TypeScript, and Vite, from transition planning to full legacy removal
- Rebuilt manufacturer search with Elasticsearch, reducing measured average backend response time from ~30 seconds to ~250 ms
- Built self-service Azure preview environments for developers, QA, and product managers, enabling feature validation before merge
- Improved web performance, raising Google Lighthouse's performance score from 50 to 90 out of 100

Senior Software Engineer

VSware | Remote (Europe/Asia)

May 2018 - May 2021

- Improved frontend infrastructure for a Vue.js application spanning ~40 monorepo packages and ~650,000 lines of code
- Designed the architecture and migration plan for a move to micro-frontends
- Established automated testing practices, growing the suite from 0 to 3,100 unit and integration tests
- Improved accessibility toward WCAG AA conformance
- Mentored junior developers

Software Engineer

Hostelworld | Dublin, Ireland

November 2016 - April 2018

- Led the frontend migration of hostelworld.com from jQuery to Vue.js
- Designed, developed, and maintained frontend and backend features for the main website
- Trained and mentored the team in modern JavaScript and Vue.js

Consultant

Conserto | Nantes, France

May 2015 - August 2016

- Architecture definition, development and maintenance of various web applications
- Developed and delivered training in PHP, Symfony2

Web Developer/Project Manager

Energy Formation (ENGIE Group) | Nantes, France

October 2011 - January 2015

- Led a project to replace paper documentation with digital documents for customers

Skills

Frontend: JavaScript, TypeScript, React.js, Vue.js, Next.js, Tailwind CSS, Web accessibility (WCAG), Web performance

Backend & infrastructure: Node.js, NestJS, GraphQL, Elasticsearch, Supabase, Docker, AWS / Azure

Quality & delivery: Unit, integration & end-to-end testing, CI/CD, Git

AI development: LLM APIs & agents, Model Context Protocol (MCP), AI-assisted development (Copilot, Claude Code)

Projects & community

- YoutubeMate: Built and launched a web app and Chrome extension that turn YouTube videos into multilingual AI summaries. Implemented enhanced transcripts and subscription billing, and maintain the live product.
- Pedalyze: Built and launched a bike-fitting app that turns rider photos into joint-angle measurements and position recommendations using AI pose estimation. Implemented video analysis in the browser to assess the full pedal stroke while keeping footage on the user's device.
- Maxpou.fr: Publish technical articles in French and English
- Mentored junior developers and people retraining as developers

Education

Architecte Logiciel / Software Architect (master degree)

ENI Ecole Informatique | St Herblain, France

2013 - 2015

Concepteur Développeur Informatique / Software Application Developer (bachelor degree)

ENI Ecole Informatique | St Herblain, France

2011 - 2013

Languages

English: Professional fluency; French: Native; Spanish: Intermediate

Interests

Canyoning (group guide), running (100 km/month), cycling, cooking, and Age of Empires II.
